## **SV11B User Manual**

USB hands-free phone / speakerphone SV11B products

The SV11B can be used for personal use and small conference rooms. It can be connected to a PC for unimpeded full-duplex voice calls. It is adaptive to 16KHz full-duplex echo cancellation and automatically adapts to audio and video products and systems with different voice bandwidths. The sound quality is clear and comfortable, and it can support video equipment, network voice, UC unified communication and instant communication software to realize convenient Internet collaborative work, improve meeting and work efficiency. SV11B is also a more economical conference system audio configuration.

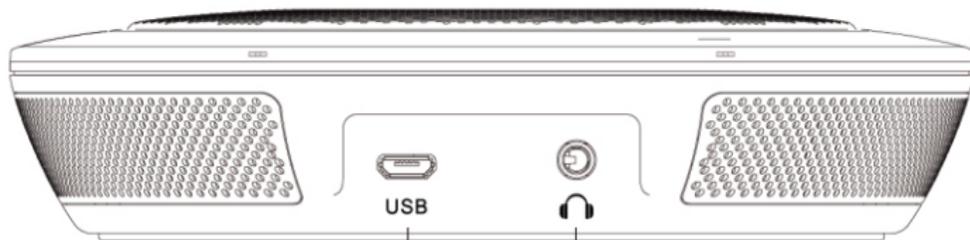

The speakerphone SV11B can be connected to other communication terminals such as computers and video terminals through a USB interface, or can be connected to a mobile phone or a tablet device via Bluetooth, and has a good function of canceling the echo. The microphone collection distance is up to 2 meters, which is suitable for a small size of 15 square meters. Professional meeting rooms and personal offices. SV11B is also suitable for remote interactive teaching and online student work.

SV11B products are exquisite and compact, and are equipped with special carrying soft bags, which are easy to carry and suitable for private travel."
