2.4G Wireless / USB Speakerphone SV11W

The 2.4G wireless and USB speakerphone SV11W make up for the shortcomings of only connecting other communication terminals through the USB cable, and newly added a wireless connection function, which can be connected to the communication terminal through a wireless adapter, and has good echo cancellation , Its microphone collection distance reaches 3 meters, suitable for small professional meeting rooms and personal offices within 15 square meters. At the same time, the product is also suitable for remote interactive teaching and student online homework.

The 2.4G wireless and USB speakerphone SV11W, it can be connected with PC for unobstructed full-duplex voice call, adaptive to 16KHz full-duplex echo cancellation, automatically adapt to various audio and video products with different voice bandwidths And system, the sound quality is clear and comfortable, can support video equipment, network voice, UC unified communication and instant communication software, to achieve convenient Internet collaborative office, improve meeting and work efficiency, but also a relatively economical audio configuration of conference system.

The SV11W is exquisite and compact, and it is equipped with a special carrying bag, which is easy to carry and suitable for private travel.

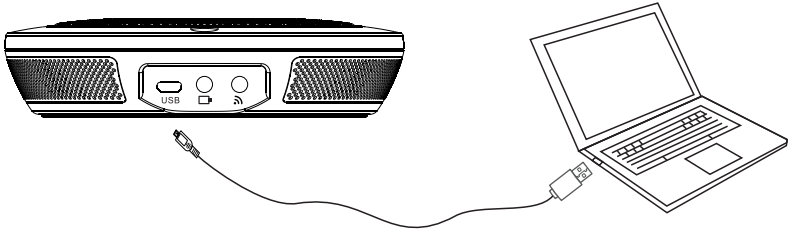
When the power is turned on, long press the power switch " ⏻ " for 3 seconds to turn on the device, and long press the power switch " ⏻ " for 3 seconds, you can turn off the device; in addition, when the USB port is connected to the computer or the external audio/video terminal is connected, the device will automatically turn on.

Note: When the device has no peripherals connected, it will automatically turn off after 3 minutes.

USB Connection

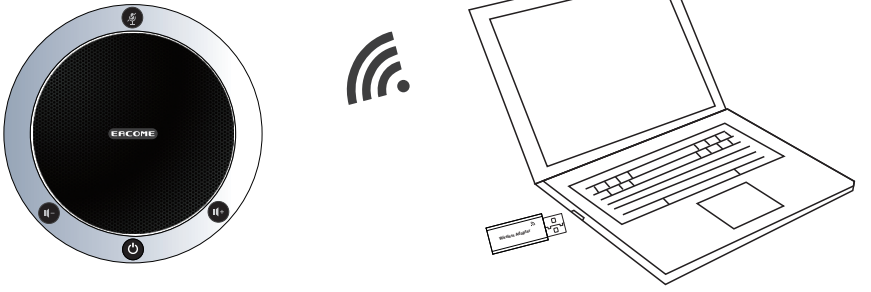
Use a USB cable to connect the PC / video system to the SV11W's USB port. It takes a few seconds to establish and install the driver for the first time.

Note: Right-click the microphone icon in the lower right corner of the PC screen and click "Sound" to display the "Sound" interface. Click the "Play" and "Record" options and check that "EACOME SV11" is set as the default device. If it is not set as the default device, click "EACOME SV11" and click the option "Set Default"



Wireless Connection

1. Connect the USB port of the wireless adapter to the USB port of the PC / audio / video terminal.
2. When the device is connected to the computer or terminal device through the wireless adapter, the wireless LED is blue light flash when wireless connection success, and wireless voice calls can be made at this time.



Application

The video conference software

- Support wireless, can connect with any conference camera,easy to realize wireless voice call
- Support USB communication, support video conference terminal, multimedia communication terminal
- Support video conference software, various network conference software, UC unified communication
- Support Zoom, Huawei Cloud, Suirui, Haostong, Webex, Aver, Bizconf, Skype
- Support speaker signal output through 3.5mm interface, connect to external mixer and sound system to achieve local sound reinforcement to meet the needs of a larger venue

Advantages

Provide full-duplex hands-free telephone function for terminal equipment

1. Connect the SV11W through the USB cable or wireless adapter of the terminal device:

- Software video conference
- Internet Voice
- VoIP voice call
- Wireless voice telephone

2. Advanced high-definition audio processing technology dedicate natural and complete audio and easy communication environment:

- Full-duplex function supports users to communicate smoothly
- Echo cancellation technology
- Noise cancellation
- Automatic gain control

3. Built-in omnidirectional microphone provides 360-degree sound pickup range

Specification

1. Speech DSP processing technology

   Deep echo cancellation, Dynamic noise suppression, Automatic gain control technology

2. Audio parameters

   Microphone frequency response: 100Hz-7KHz

   Speaker frequency response: 100Hz-22KHz

   Microphone pickup range: 3 meters, 360 degree full range

   Speaker volume: up to 80dB

3. Support system

   Win 2000, XP, Vista, Win 10, Linux, Apple IOS , Android OS

4. Network and interface

   USB port x 1

5.Size: 137*137*mm

6. Use environment

Reverb time: < 0.2’
Noise level: < -48dBA
Power: standard USB, 5V--500mA
Working temperature: 4°C-50°C
Storage temperature:0°C-70°C
Humidity: 20%-85%
Safety specification: CE Mark (LVD & EMC directive) , RoHS
